Abstract: In recent years, the problem of violation of discipline and corruption of young cadres has become increasingly prominent, and college students as the backbone of future social development, strengthening the construction of college students' incorruptible culture is conducive to preventing corruption from the source. However, at present, the construction of college students' incorruptible culture has not attracted enough attention, and there is no system and mechanism, and most of them are free fighting or mechanical completion of tasks. This paper puts forward the idea of building a "Incorruptible education community" in colleges and universities, and discusses and analyzes the construction of the community from two aspects of necessity and feasibility, in order to build a path of incorruptible culture construction that can be replicated, promoted, sustainable, normal and long-term.

Keywords: College education; Incorruptible education; Incorruptible education community

Fund Project: This paper is the phased achievement of the 2023 project "Research on the Realization Path of College Incorruptible Culture Education Community" by Discipline Inspection and Supervision Research Center and the College Branch of Sichuan Discipline Inspection and Supervision Society (project number: SCJ230201).

1. Introduction

In February 2022, the General Office of the Central Committee of the Communist Party of China issued the Opinions on Strengthening the Construction of a incorruptible Culture in the New Era (hereinafter referred to as the Opinions), which stressed that all regions and departments should further strengthen their organizational leadership, "to shoulder the political responsibility for the construction of a incorruptible culture, and to incorporate the construction of a incorruptible culture into the construction of Party conduct and clean government and anti-corruption work layout." Make arrangements, study and solve problems, "and encourage the establishment of an overall coordination mechanism for the construction of a incorruptible culture to form a joint effort. Therefore, the systematic promotion and integrated promotion of the construction of incorruptible culture should become the meaning of the topic of strengthening the construction of party conduct and incorruptible government and anti-corruption work in all regions and departments. As a school owner, it is worth studying how to carry out the construction of incorruptible culture in combination with the characteristics and reality of colleges and universities, create a incorruptible culture atmosphere, and play the actual effect of incorruptible culture construction. At present, we do not pay enough attention to the construction of college students' incorruptible culture, do not have a good understanding of the education effect of incorruptible culture, do not form a system and mechanism, and most of them are free fighting or mechanical completion of tasks. This paper puts forward the idea of building a " incorruptible education community" in colleges and universities, in order to become a replicable, extendable, sustainable, normal and long-term path of incorruptible culture construction.

2. The proposal and practice of the concept of "incorruptible education community"

In the past literature, there has been a reference to "incorruptible education", but it is more in the application level than in the concept level. The so-called "incorruptible education", that is, the short for incorruptible culture education, this paper puts forward "incorruptible education" as a concept for the first time, and takes "five education", that is, moral, intellectual, physical and beautiful labor as a reference and standard. The concept of "incorruptibility" is the supplement and development of "five education", which

raises “incorruptibility” to a new height. In the past, “incorruptibility” was more considered in the category of “virtue”, weakening the importance and uniqueness of “incorruptibility”. And the new era gives “incorruptibility” more initiative and creativity, “incorruptible education” as a kind of divergence concept, through the “incorruptibility” of the force and penetration, based on the goal and direction of “education”, is to strengthen the concept of the construction of incorruptible culture in the new era, will also bring “domino effect”.

The concepts of “incorruptible education” and “education incorruptible” seem similar, but there are essential differences. “incorruptible education” means “incorruptibility breeds others”, “incorruptibility” is the medium, and “education” is the purpose. “education incorruptible” emphasizes that “others breeds incorruptibility”, “education” is the medium and “incorruptibility” is the purpose. In contrast, “incorruptible education” more prominent the role of clean play, its influence is more far-reaching, more extensive significance. Taking colleges and universities as the field of practice, this paper tries to build a “incorruptible education community” from the level of system and mechanism, which is not only an innovation of system and mechanism, but also an innovation of idea.

In a broad sense, the object of the “incorruptible education community” in colleges and universities can cover all people in colleges and universities, and from the institutional mechanism, there are vertical levels of “discipline inspection professional incorruptible education”, there are horizontal levels of functional departments “functional supervision of incorruptible education”, and there are teaching units at the level of professional integration of “professional incorruptible education”. From a narrow perspective, the “incorruptible education community” discussed in this paper is mainly for college students, that is, it is an organizational form that takes incorruptible culture education as the core, integrates resources and forms a joint force to jointly promote the construction of incorruptible culture, and is a “vertical and professional linkage” community. It emphasizes the participation and interaction of multiple parties, aiming to do a good job in the “second classroom” according to the cognitive law of students, and create an immersive campus integrity atmosphere; ^[1]At the same time, it also pays attention to exerting the strength of various disciplines in colleges and universities to promote the popularization and development of incorruptible culture education.

Taking a provincial normal college as an example, due to the influence of the nature of the college and the environment, most students choose to work in the profession of teaching and politics, which has a large impact, and strengthening the construction of incorruptible culture at the university stage is of great significance to their personal growth and social development. In combination with the actual situation of the school, the Party committee and the discipline inspection committee of the school highlight the concept of “professional + incorruptible education” to create a three-dimensional education scene, and explore the formation of a multi-platform and cross-professional incorruptible education community with the second-level discipline inspection organization as the unit and professional characteristics as the carrier. Gradually form the school of Marxism ideological incorruptibility, the school of law discipline law interpretation incorruptibility, the school of Fine arts and calligraphy, the school of culture and creativity, the school of film and media media communication incorruptibility, the school of music, the school of dance song and dance incorruptibility, the school of discipline inspection theory to assist the incorruptibility of the three-dimensional education pattern, to create the “small carrier” of the education of incorruptibility to realize the “great incorruptible”. Plan activities such as “Refreshing Little Theater”, “Youth Talk incorruptibility”, “Shishan Talk Lecture Hall”, “Shishan Painting Lian” and “Shishan Singing Lian” to create an immersive “incorruptible education” position in which teachers and students of the whole school participate widely. Every year, through the “full scene” of incorruptible culture for 2-3 months, teachers and students of the whole school are guided to consolidate the foundation of incorruptible thought and create a incorruptible campus atmosphere. From the ideological, political and action to be a firm believer in the culture of incorruptibility, active disseminators and model practitioners. In the practice of more than two years, it is found that through the “incorruptible” of the professional, ideological and political, education and other elements are well combined together, and each education matrix is oriented to the whole school, rather than the teaching unit, in the effectiveness of the education can produce more chemical reactions. More and more teaching units are also involved, and actively innovate, take the initiative to think and plan, as a long-term, normal, long-term task to actively promote.

3. The necessity and feasibility analysis of the construction of college incorruptible education community

3.1 Necessity analysis

Education is the major plan of the country and the Party, and college students are the main reserve army of the future cadre team, the reserve team of talents in all fields, and the builders and successors of the socialist cause. Strengthening the education of incorruptible culture for college students is an inevitable requirement for strengthening and improving the ideological and political work of college students, and it is an inevitable requirement for strengthening the construction of incorruptible culture in the new era. It has important practical significance and far-reaching historical significance.^[2]As a part of the society and an important place for personnel training,

colleges and universities are duty-bound to promote the construction of incorruptible culture systematically and as a whole.

Through the construction of the incorruptible education community, college students will no longer feel that the incorruptibility is boring, but full of vitality and vitality, which can spark with various majors, but also let them better understand the needs of society, and cultivate the spirit of social responsibility and responsibility, which is of great significance for college students to enter the society after graduation and actively participate in the development of social undertakings.

In addition, with the development of the social economy and the complexity of the social environment, the problem of violations of discipline and corruption of young cadres has become increasingly prominent. The university stage is not only an important turning point in life, but also a stage of social cohesion. At this time, strengthening the work of incorruptible education has a profound impact on the future of college students and the future of the country. It can help college students establish correct values and outlook on life, and enhance their sense of responsibility and mission. At the same time, it can guide them to correctly deal with the relationship between individual interests and collective interests, and cultivate their consciousness and spirit of serving the people. Therefore, incorruptible education is of great practical significance to the growth of college students and the development of society. To achieve this goal, it is necessary to establish an effective mechanism and platform to promote and promote the common development of college education. Therefore, the idea of building a “Incorruptible Education Community” came into being.

3.2 Feasibility analysis

As an important place for personnel training, colleges and universities shoulder the fundamental task of cultivating morality and cultivating people, and have unique advantages and resources in the construction of a incorruptible education community. The core work of colleges and universities is to educate people, in the aspect of education has natural advantages and advantages, incorruptible education is also in its scope, but in the past relatively weakened, and the power platform, ways and methods of education can be transferred. The multi-disciplinary construction of colleges and universities is also conducive to building a incorruptible education community. With the form of “professional + incorruptible education”, a diversified cooperation mechanism and a multi-party linkage pattern can be established. Encourage all teaching units to start from their own specialties, and “express” their ideas, atmosphere and culture through professional integration. At the same time, colleges and universities have rich teachers, teaching resources and scientific research conditions, which can provide necessary support and guarantee for the “incorruptible education community”. The creation of the “incorruptible education community” has also made the whole school have a concept of incorruptible education, providing a platform for mutual exchange and support, enhancing the expression of incorruptible culture through sharing courses, lectures, seminars, social practices and other ways, showing the vitality and vitality of incorruptible culture everywhere, systematically promoting and integrating the construction of incorruptible culture in colleges and universities, and enhancing students’ awareness and responsibility for incorruptible education. It also helps them better understand and cope with some problems in society from the perspective of integrity.

4. Conclusion

“Incorruptible education” is an important part of ideological and political education in colleges and universities, and the construction of incorruptible education culture in colleges and universities in the new era is a long-term, systematic and arduous task. [3]The building of “incorruptible education community” provides an effective path and reference for colleges and universities to carry out incorruptible education work, and is a practical exploration of integrating incorruptible culture in colleges and universities into the main field of education, but it needs to be further enriched and improved.
