Liaoning Provincial Education Working Committee, 2023 University Party Construction Research Project “Research on the Professional Construction of University Cadres”

Chinese-style modernization is a socialist modernization under the leadership of the Communist Party of China. It not only has the common characteristics of the modernization of all countries, but also has Chinese characteristics based on its own national conditions. As General Secretary Xi Jinping has stressed, “Promoting Chinese-style modernization is an unprecedented and pioneering undertaking. It is bound to encounter all kinds of predictable and unpredictable risks, challenges, difficulties, obstacles and even stormy waves. We must be more aware of potential dangers. “After the political line is determined, the cadre is the decisive factor. The core of realizing modernization is the realization of human modernization^[1]. Among them, as the key content of human modernization, the professionalization of cadres is not only an important support for the realization of Chinese modernization, but also an important guarantee for the promotion of Chinese modernization. Under the overall plan of comprehensively advancing the five-sphere integrated plan and coordinating the four-pronged comprehensive strategy, cadres have moved forward by promoting high-quality development, preventing and defusing risks, maintaining overall stability, and realizing the goal of peoples happiness. This requires the cadre team to improve their own ability quality, mental state, style image. Under this background, the all-round construction of a modern socialist country, must have a political quality, to adapt to the requirements of the new era, have the ability of leadership modernization cadres, including adhere to the correct modernization road ability, promote the undertakings of socialism with Chinese characteristics, grasp the implementation of the important content such as^[2].

1. Deep understanding of the connotation of The Times of the professional construction of cadres in the new era

The specialization of the cadre team is a historical category, with distinct characteristics of The Times^[3]. At the same time, the building of the cadre team concerns the prosperity, long-term stability of the country and the happiness of the people. As General Secretary Xi Jinping has pointed out, “the key to building a modern socialist country in an all-round way and promoting the great rejuvenation of the Chinese nation lies in the Party and the people. We should strive to build a strong and high-quality ruling backbone

team that can be the important task of national rejuvenation. “In the second centenary goal, the construction of high-quality cadres is not only the internal logic for leading cadres to fulfill their mission, but also the realistic need of comprehensively building a modern socialist country in the new era ^[4]. In the successful practice of our Party uniting and leading the Chinese people to achieve the first centenary goal, it has fully proved that the professionalization of the ranks of cadres in the progress of the cause of the Party and the country plays an important role as the ideological lamp and the foundation stone in development.

(1) In the new era, we must firmly grasp the Party's purpose and original mission. The Communist Party of China is not only a party armed with Marxism, but also a party determined to seek happiness for the Chinese people and rejuvenation for the Chinese nation, but also a party for the struggle of the interests of the people and the nation ^[5]. The blood and strength of our Party's development lies in the people. Comrade MAO Zedong once stressed that “all our cadres, no matter how high or low, are servants of the people, and everything we do is to serve the people.” This not only provides the fundamental purpose for the professional construction of the cadre team, but also points out the eternal mission of the Communist Party of China ^[6]. The reason why The Chinese modernization can realize the transcendence of western modernization is precisely because the Communist Party of China wants to realize the Chinese modernization with the value of people first, which is the Chinese modernization ^[7] with people-oriented logic and the abandonment of capital logic.

(2) In the new era, we must firmly grasp the “five standards” for cadres. The connotation of the broad masses of the people on the overall situation of the party's cadre team ^[8]. Selecting and making good use of cadres has always been a key and fundamental issue concerning the cause of the Party and the people. Professional construction of cadre team through the comparison of the “five standards”, can effectively for the cause of the party and the people, really grasp the good cadres selected, so as to make more diligent and pragmatic, for the people service cadres stand out, further provide an important guarantee for the modernization of Chinese style ^[9].

(3) In the new era, we must firmly strengthen our overall ability to govern. As socialism with Chinese characteristics has entered a new era, our Party requires it to be both politically competent and highly competent. Choose what people have what kind of cadre style, and even what kind of party, comprehensively enhance ruling ability, promoting Chinese modernization, must strengthen the construction of cadres of high-quality specialization, correctly handle various problems in the ruling activities, in order to realize the great dream, has many new historical characteristics of the needs of the great struggle, to help Chinese modernization.

2. Promoting the modernization of Chinese style requires the professional construction of cadres

The world today is undergoing profound changes unseen in a century. The great rejuvenation of the Chinese nation has entered a critical period, risks and challenges on the road forward are complex and volatile, and the tasks of reform, development and stability are arduous, setting higher requirements for the professionalization of officials. In his party's 20th annual report, General Secretary Xi Jinping once again stressed that “officials should enhance their ability to promote high-quality development, serve the people, and prevent and defuse risks. “High-quality development is the primary task of building a modern socialist country in an all-round way and one of the essential requirements of Chinese modernization.

The professionalization of the ranks of cadres must adhere to the principle of the Party governing cadres. For the Party to supervise the Party, first of all, we must manage our cadres well. Later, General Secretary Xi Jinping pointed out that, “The principle of the Party governing cadres is an important reason why our Party is strong and powerful, and we must consciously adhere to the principle of the Party governing cadres.” In fact, adhering to the principle of the Party managing cadres is not only the fundamental way and basic experience to ensure that the cadres are loyal, clean and responsible, but also an important embodiment of the Party's organizational leadership, and an important guarantee for the Party's leadership. In terms of connotation, to accurately grasp the principle of the Party governing cadres, we must deeply realize that the most essential feature of socialism with Chinese characteristics is the leadership of the CPC.

The professionalization of cadres must firmly establish the fundamental thought of taking a people-centered approach. The Chinese-style modernization always adheres to the people-centered development thought, which is the inheritance and development of the original intention of the Marxist modernization theory and philosophy. The question of “who is” is not only a fundamental question, but also a touchstone to test the nature of a political party and a political power. The Communist Party of China comes from the people, and its foundation and blood lie in the people. Adhering to the philosophy of people-centered development not only embodies the Party's ideals, beliefs, nature, purpose, and its original mission, but also provides a profound summary of the Party's struggle and practical experience. Therefore, the construction of a professional cadre team must take the people first as the fundamental starting point and foothold of the construction, and always put the people in the highest position in their hearts, so as to

help the Chinese modernization drive.

3. To build a contingent of high-quality professional cadres in the new era to empower Chinese-style modernization

General Secretary Xi Jinping has pointed out that “Chinese-style modernization has not only the common features of all countries, but also the distinctive features based on its own national conditions.” He further stressed that “Chinese-style modernization with smooth and stable progress is the only correct path for building a strong country and national rejuvenation.” Construction of high-quality professional cadres to accurately grasp the profound connotation of Chinese modernization essence, from China's modernization development process absorb spiritual nutrients and struggle strength, adhere to the leadership of the party, adhere to the tenacious struggle, adhere to self revolution, strengthen thought refinement, political experience, practice, professional training, firm to walk the “only right path”, being a good “Chinese modernization” practitioners, promoters, doer, for Chinese modernization construction.
