Changsha Normal University, Changsha 410100, China.

Abstract: Carrying out ideological and political education for college students is one of the core tasks of all colleges and universities. In the teaching process, higher requirements are put forward for teachers' professional ability and quality. Teachers carefully design the teaching content, teaching activities, teaching plans, etc. in combination with the actual situation, enhance the interaction between teachers and students in the classroom by stimulating students' interest in learning, and fully integrate Marxist classic reading, which can not only innovate the path of ideological and political education for college students, It can also explore the charm of Marxist classics, influence students' values and outlook on life, and play a strong role in promoting the overall development of college students.

Keywords: Marxist Classic Reading; College Student; Ideological and Political Education

Introduction

The important position for the spread and practice of Marxism is colleges and universities. Through the development of practical activities, teachers guide students to explore the basic principles of Marxism, which has strong effectiveness. Especially in the context of the development of the new era, it helps to enrich the content of Marxist classic reading and aesthetic theory, and cultivate college students' sense of responsibility and mission. In addition, with the application of multimedia technology, we will increase the spread of Marx's ideas, which will have a more prominent educational effect, affect the aesthetic taste of college students, and ensure that colleges and universities cultivate more outstanding talents.

1. The Necessity of Integrating Marxist Classics into College Students'

Ideological and Political Education

1.1 Realizing the Chinese Dream of the great rejuvenation of the Chinese nation

In the teaching process, teachers guide students to carefully explore Marx's life experience, which helps students fully understand the classic content of Marxism, truly understand Marx's strong feelings for the people, and focus on learning his excellent quality, correct values and world outlook ^[1]. The design of teaching content will also be closely related to students' daily life and learning, so as to mobilize students' enthusiasm, promote the perfect integration of ideological and political education and Marxist classic reading, and at the same time stimulate students' desire to explore, urge students to learn wisdom and strength, have lofty ideals and ambitions, realize personal value in struggle and innovation, and jointly make positive contributions to the realization of the Chinese Dream of the great rejuvenation of the Chinese nation, So as to promote the harmonious development of modern society.

1.2 Cultivate students' correct view of truth

Considering the strong academic and ideological nature of Marxist classic reading texts, it puts forward higher requirements for students' reading ability. The theoretical background is complex and the discourse system is logical. When

most students first come into contact with Marxist classic reading texts, they will not have a thorough and comprehensive understanding of their relevant knowledge, historical background, and professional terms. With the continuous increase of content, They will be afraid of reading and learning Marxist classics. In this regard, it is inseparable from the correct guidance and teaching of teachers. Only by mobilizing students' initiative, helping students "read in" and "understand", thinking in reading, mastering in thinking, enhancing basic ability, systematic research and learning, understanding ideological issues, and feeling the power of charm and truth can we ensure that students establish a correct view of truth and cultivate pillars for the country.

1.3 Enhance students' sense of responsibility

The new force of Marxist theory is the Communist Party, and colleges and universities are important positions for educating people. Their duties and obligations should be performed independently in practice, laying a good foundation for the stable development of the Chinese nation. By carrying out ideological and political education courses for college students, we can cultivate college students' correct values and worldviews, and integrate them into the reading of Marxist classics, promote the better integration of China's revolutionary reform and construction and the reading of Marxist classics in practice, seek answers and gain wisdom in the reading of Marxist classics, become the theoretical basis for building a socialist modern power, and enhance students' sense of responsibility, Establish a firm and correct political outlook.

2. Measures to Integrate Marxist Classics Reading into College Students'

Ideological and Political Education

2.1 Carry out practical activities and define the goal of education

The requirements for educating people in the new era have changed significantly, with more emphasis on the perception of Marxist principles, guiding contemporary college students to explore bravely, pursuing the power of truth to understand Marxist classics with a spirit, focusing on practical teaching activities, having a clear goal of educating people, making great efforts to innovate the mode and approach of ideological and political education for college students, and cultivating students' firm belief in Marxism ^[2]. For example, to create a social practice base, patriotism education front, etc., to preach Marxist classics, through step-by-step guidance teaching, stimulate students' ideological resonance in practical activities, acquire knowledge in many ways, significantly enhance their self-consciousness and ability, truly understand the ideological charm of classics, comprehensively create a good atmosphere of "reading classics, learning classics, using classics", and improve college students' theoretical literacy.

In addition, we can also carry out special lectures on Marxist classics, which is conducive to the joint participation of teachers and students. Teachers can obtain teaching resources in many ways, master the actual situation of each student, design diversified teaching programs to meet students' learning needs, choose holidays, memorial days and other thematic practical activities, inherit traditional culture in learning, enhance theoretical confidence, and make Marxist classics "live", It will provide favorable conditions for the development and implementation of the great rejuvenation of the Chinese nation.

2.2 Building the teaching staff to improve the level of education

The construction of the teaching staff is also one of the most important tasks. The focus is on the complex structure, logic and profundity of Marxist classic reading texts. In order to ensure that college students can understand and master the essence of Marxism, they also need to have a strong desire to explore, have a strong interest in it and have the courage to explore. Colleges and universities provide strong support in this regard, and increase the construction of the teaching staff, Through the correct guidance and teaching of professional scholars, the abstract theoretical system can be taught in the most concise and understandable way, smoothly integrated into the ideological and political education activities of college students, accepted the baptism of Marxist classics, and affected students' ability and quality ^[3]. At the same time, each teacher in the teaching staff gives full play to his/her own comprehensive ability and theoretical literacy, has a solid theoretical foundation,

improves the level of education, while ensuring the practical effect of ideological and political education for college students, and has a significant impact on the level and ability of college students to read Marxist classics.

2.3 Introduce advanced technology to meet the development needs of students

The integration of Marxist classic reading into college students' ideological and political education should build a bridge in the teaching process, introduce advanced technology, help enrich teaching methods and content, start from meeting students' learning needs, and improve the educational effect with the application of new media technology. For example, in the stage of reading Marxist classics, in order to make the reading of Marxist classics "live", students obtain resources and communication resources from the Central People's Radio and Television, provincial radio stations, CCTV and other media, which not only affect the values and outlook on life of college students, but also guide social public opinion to the right direction. Then consider the psychological needs and aesthetic tastes of college students, and choose a new way to show the ideological content that is popular and closely related to students, such as WeChat, microblog, short video, etc., to spread Marxist classics in college students' daily life and learning. The teaching effect is twice as effective as half the effort, to enhance students' sense of satisfaction and happiness, and to shine the light of truth.

Conclusion

Under the background of the new curriculum reform, the integration of Marxist classic reading into the ideological and political education of college students can not only realize the Chinese dream of the great rejuvenation of the Chinese nation, but also cultivate students' correct outlook on truth and enhance their sense of responsibility. By attaching great importance to this aspect, colleges and universities should strengthen the construction of the teaching staff, lay the foundation for the opening of practical activities, and improve the level of education. At the same time, we should clarify the goal of education, introduce advanced technology, meet the needs of students' development, affect the personal quality and ability of contemporary college students, and cultivate outstanding talents for the development of the new era.
