This paper is a humanities and Social science project of Shandong Province in 2021. The project title is "Informatization Reform and Practice of Innovation and Entrepreneurship Education in Higher Vocational Colleges under the Cooperative Education Environment of" Government, School and Enterprise ". The project number is 2021-YYGL-48

## Introduction:

Craftsman is a kind of honorary title for highly skilled talents in our country. Whether in ancient times or in modern society, the state attaches great importance to craftsman. And the craftsman has a serious, rigorous, dedicated work philosophy and sense of responsibility has gradually been inherited by history, and has become a valuable craftsman spirit at present. Therefore, the craftsman spirit has become an important indicator to measure the professionalism and working ability of a technical talent. As the cradle of cultivating technical talents, higher vocational colleges should also attach great importance to the cultivation of talent craftsman spirit, so as to improve the adaptability of technical talents to market positions.

## 1. The important influence of craftsman spirit on Higher Vocational Students

With the continuous development of China's social economy, China has made some achievements in industrial production and manufacturing, and is currently facing great pressure of transformation and upgrading. Under the influence of such pressure, China must change the traditional production mode and treat industrial production and manufacturing with a more focused, professional and scientific attitude. As an important base for cultivating social and technical talents, higher vocational colleges also need to actively improve the professional ability and technical literacy of higher vocational students.<sup>[1]</sup>

## 2. Deficiencies in the cultivation of craftsman spirit in Higher Vocational Colleges

### 2.1 Students' learning enthusiasm is not high

In recent years, with the continuous development of Internet technology, many network cultures have been spread in the form of the Internet, including some misleading information content, which has a negative impact on the value judgment of higher vocational students. Under the influence of such values, many students in higher vocational colleges can't immerse themselves in boring and single technology learning, and it's difficult to accept long-term knowledge learning and accumulation, yearning for the acquisition

of short-term benefits. Therefore, it is difficult for such students to make the best of their majors and jobs, let alone learn the spirit of craftsmanship.

## **2.2 Insufficient permeability in the process of education and training**

As a kind of spiritual will, the best education mode of craftsman spirit is to integrate it into professional and technical education courses, so that students can have a subtle understanding and understanding of craftsman spirit after mastering basic professional skills and knowledge, so as to create a rigorous, scientific and dedicated craftsman image, and let technical students take this as an example. However, in the actual infiltration teaching, some teachers lack the concept of infiltration consciousness, do not integrate the craftsman spirit into the curriculum teaching, and can not achieve the expected teaching effect.

## **2.3 The understanding of craftsman spirit is not deep enough**

Craftsman spirit is an important spiritual concept of technical talents, and it is an extremely rare professional ideal. From the perspective of spiritual connotation, craftsman spirit is the unity of professionalism, professional attitude and humanistic quality. It is an important spiritual concept that includes professionalism, professionalism and humanism. However, in the current fast-paced and high-pressure social environment, many students regard the craftsman spirit as a kind of “clumsy” spiritual consciousness, which is an educational model to cultivate people as robots. Under such misunderstanding, many students are difficult to actively accept the cultivation of craftsmanship spirit and cannot cooperate with teachers to complete teaching tasks<sup>[2]</sup>.

# **3. The path of cultivating craftsman spirit in Higher Vocational Colleges**

## **3.1 Infiltrate craftsman spirit into practical teaching**

The teaching system of Higher Vocational Colleges mostly includes basic technical knowledge, theoretical learning and practical teaching, in which practical teaching is a very important and basic teaching content, and it is the teaching link that has the greatest impact on the future employment of higher vocational students. Therefore, teachers in higher vocational colleges should also seize this opportunity and strive to make students aware of the guiding significance of craftsmanship to practical work through practical teaching links.

## **3.2 Clarify talent training objectives**

With the transformation and upgrading of society, higher vocational colleges themselves should also follow the social trend in the direction of talent training, and strive to meet the needs of social economic construction and the requirements of supply side structural reform. At the same time, higher vocational colleges themselves need to be clearly aware of the current social requirements for technical talents, which require technical talents not only to have basic professional knowledge, but also to have a certain comprehensive literacy ability.

## **3.3 Strengthen the guidance of Ideological and Political Education**

The essence of craftsman spirit is more consistent with the main views of Ideological and political education. At present, most vocational college students are also affected by the thinking of social money worship and hedonism, and it is difficult to immerse themselves in the education system of craftsman spirit.

# **4. Concluding remarks**

To sum up, craftsman spirit is an important spiritual connotation of technical talents and a concentrated embodiment of professionalism and professional quality. As the cradle of cultivating technical talents, higher vocational colleges have outstanding purposes in talent education. In this regard, higher vocational colleges need to feel the direction of social demand for talents. They should not only cultivate the technical level of talents, but also guide technical talents to have a certain craftsman spirit and professional philosophy, so as to improve the employability of technical talents and meet the job requirements of social enterprises.
