Abstract: Student teaching management is an important part of the daily work of colleges and universities, and its effect directly determines the smooth implementation of various work in colleges and universities. Integrating ideological and political education into this work can not only effectively cultivate students' correct three views, personal cultivation and moral character, but also provide an important driving force for students' teaching and management, so as to promote the smoother and more orderly progress of talent training. This paper first briefly analyzes the necessity of integrating ideological and political education and student teaching management, and discusses the strategies for effective integration of the two for the reference of relevant colleagues.

Keywords: Universities; Ideology and politics; Student management; Fusion

Introduction

Nowadays, with the increasing demand for comprehensive talents in various industries, colleges and universities should change the traditional concept in talent training, reform and innovate student teaching management, the most important of which is to improve the existing student teaching management work system and improve the effectiveness of work by integrating ideological and political education, and at the same time, it can further strengthen the quality of ideological and political education and effectively achieve the set goal of talent training in colleges and universities. Whether it is student teaching management or ideological and political education, the ultimate goal of both is to cultivate more outstanding talents, and the main body is also students, so if they can be effectively integrated through reasonable strategies based on their internal connections and characteristics, it will inevitably create favorable conditions for the high-quality development of talent training in colleges and universities.

1. The necessity of integrating ideological and political education in colleges and universities with student teaching management

1.1 Improve the effectiveness of management work

The implementation effect of student teaching management has a great impact on improving the quality of talent training in colleges and universities, and is also an important factor determining the healthy and stable development of colleges and universities. Nowadays, the vast majority of colleges and universities attach great importance to the reform and innovation of student teaching management, especially in the context of the new era, college students face the temptation and influence of many bad content is easy to go astray, once the student teaching management work does not play its due role, the development of the school will not only have a negative impact, but also affect the growth and development of students. In view of this problem, ideological and political education can be integrated into student teaching management, which can improve the effectiveness of the work, such as the current student teaching management in the obvious rebellion psychology, not very cooperative with the management work, so in the ideological and political teaching can guide students to correctly understand the necessity and

importance of this work, understand why to do this, so as to lay a solid foundation for the smooth implementation of student teaching management, thereby promoting the overall level of student management^[1].

1.2 Improve the level of ideological and political teaching

The main problem in the ideological and political teaching of traditional colleges and universities is the lack of practice, and many times it is teachers who follow the book on the stage, which not only achieves the established teaching goals, but also makes students have a wrong understanding of ideological and political learning, and resists ideological and political learning. However, organically integrating it with student teaching management can create opportunities and provide a platform for ideological and political practice teaching, which can effectively stimulate students' enthusiasm for ideological and political learning, and help improve students' practical ability, thereby improving the level of ideological and political teaching. For example, the content of ideological and political education is usually relatively abstract, such as values, team spirit, self-management, etc. , if these contents are only instilled in students in the form of written language, it is difficult to promote students' internalization of these contents. However, through the integration of ideological and political education and students' teaching management, this situation can be changed, such as allowing students to participate in daily management work, experience the knowledge learned in ideological and political classrooms, and improve their hands-on practical ability.

2. The strategy of effective integration of ideological and political education and student teaching management in colleges and universities

2.1 Adhere to the humanistic work concept

In order to promote the integration of student teaching management and ideological and political education, the relevant staff of colleges and universities must change their concepts and guide the specific practice of this work with humanistic concepts. In the traditional ideological cognition and concept, students are in a disadvantageous position in both ideological and political education and teaching management, and it is difficult for their ideas and demands to get attention, which can easily cause students' rebellious psychology, thus affecting the smooth development of various work. Therefore, in order to achieve the integration of student teaching management and ideological and political education, it is necessary to respect students and give them the opportunity to express their views and express their demands, such as placing suggestion boxes on campus, setting up suggestion boxes in the intranet on campus, etc. , so that students can fully participate in these work and give play to their subjective initiative, which can not only reduce the burden of faculty and staff, but also adjust working methods and content in time according to some ideas and demands put forward by students. In order to better realize the integration of the two, teachers should not only firmly establish the concept of humanism, but also allow students to form a sense of subjectivity through high-quality ideological and political education, and encourage students to express their ideas through correct ways and methods, which can not only improve students' ideological realm, but also lay a good foundation for the deep integration of the two work.

2.2 Establish a student teaching management platform

Everything needs to pay attention to strategies and methods, the same is true for the integration of student teaching management and ideological and political education, simply put, it is necessary to adopt diversified, scientific and humanized management methods and teaching strategies to promote its better integration and improve work efficiency and overall level. At present, the application of information technology in various work in colleges and universities is becoming more and more in-depth, so in promoting the deep integration of the two, the student teaching management mode should be based on information technology innovation. For ideological and political education, it is also possible to rely on the platform to understand the specific situation of different students, and then implement personalized education for students.^[2]

2.3 Innovate student teaching management methods

In order to improve the effectiveness of student teaching management and ideological and political education, in the practice of education and teaching, teachers must effectively use the advantages of ideological and political teaching, communicate well with students, understand their real ideas on student teaching management, and at the same time solve some common problems in the student group through ideological and political education, so as to achieve the effective integration of the two and comprehensively improve the quality of talent training. In specific practice, teachers need to pay attention to the innovation of methods and strategies, for example, for some students with low self-esteem and poor psychological quality, teachers of student teaching management can seek the help of psychological counselors in schools, or contact counselors to discuss scientific

and reasonable coping strategies to help students solve problems in psychology and thought as soon as possible.

2.4 Improve the quality of the teaching management team

In the rapid development of the times, contemporary college students are different from people's traditional cognition of this group in many aspects, and with the reform of higher education, student teaching management and ideological and political teaching have undergone great changes, such as concepts, methods, etc. , which have put forward higher requirements for the comprehensive quality of student teaching management team. Therefore, during the period of promoting the effective integration of the two, colleges and universities must build a high-quality student teaching management team, on the one hand, they need to strictly select from the existing teaching staff, such as excellent work style, strong business ability, and actively absorb outstanding talents with relevant work experience; On the other hand, it is necessary to establish and improve the evaluation reward and punishment mechanism, the purpose of which is to stimulate the enthusiasm of managers and teaching staff and restrain their work behavior, so as to improve the effectiveness of actual work and achieve the goal of talent training^[3].

2.5 Guide students to correctly understand ideology and politics

From the actual development of ideological and political education in colleges and universities, because teachers blindly pay attention to the teaching of theoretical knowledge content, many students have a wrong understanding of ideological and political education, let alone raise their interest in learning, which obviously cannot have a positive impact on the development of students' teaching management. Therefore, in order to achieve deep integration of the two and improve the effect of talent training, ideological and political teachers must innovate teaching methods and management methods in classroom teaching, guide students to correctly understand ideological and political teaching, and on this basis, they can continuously enrich themselves by effectively participating in ideological and political teaching activities.

3. Conclusion

By integrating ideological and political education with student teaching management, it can not only strengthen the effect of ideological and political education, but also help improve the effectiveness of student teaching management, which has a profound impact on improving the quality of talent training. At present, most universities are actively promoting the effective integration of the two, but due to lack of experience and theoretical guidance, many problems have arisen in specific practice, and it is difficult to achieve the ideal integration effect. Therefore, relevant departments and faculty should continue to summarize in practice, and at the same time learn from the excellent experience of other universities, so as to ensure the deep integration of ideological and political education and student teaching management, so as to provide important help for students to achieve better development.
