The Internet era is also an era of rapid development of information technology. The scale of Internet users in China has increased year by year, and the Internet penetration rate has also increased significantly. The number of online users in the field of education in China has reached hundreds of millions, and it is growing steadily by tens of millions every year. The effective combination of Internet and education, on the one hand, is the trend of the times, on the other hand, is the actual demand. Under the situation of Internet development, ideological and political theory education in higher vocational colleges will also face major development opportunities. Therefore, we should follow the pace of the development of the times, comprehensively control the relevant opportunities and face the relevant challenges, so as to effectively follow the law of Internet development and control the characteristics of the times of the Internet. Combined with Internet resources and relevant means, the Internet development model is actively applied to the ideological and political education process in higher vocational colleges, so as to promote the effective development of ideological and political education in higher vocational colleges. Update educational concepts and theories, promote the development process of ideological and political education in an era, improve teaching quality, and help the society cultivate high-quality new people of the era.
