Abstract: with the continuous development of reform and opening up, economic construction has achieved rapid development, at the same time also appeared in the society all sorts of ideas, for higher vocational students' education work has brought some impact on national security. Under this background, how to better develop education in higher vocational colleges through the content, path and means of national security education has become a new topic, this thesis firstly analyzed the current situation of national security education for higher vocational students in our country and the necessity of national security education for higher vocational students, and then put forward a series of optimization strategies, It is hoped that the quality of higher vocational national security education can be effectively improved, and students can be better integrated into society to make due contributions to social construction and development.

Key words: higher vocational students; National security education; Optimization strategy

Introduction

At present, along with the improvement of our country's comprehensive strength, our country's national security is in an increasingly complex and severe situation coming from various adverse challenges from outside factors. As an important cornerstone of the future development of China's socialist cause, higher vocational students are directly related to the security of the whole country whether their knowledge of national security is rich or not and whether their consciousness of resisting is strong. Therefore, it is urgent and important to strengthen the national security education of students in higher vocational colleges.

1. Analysis of the current situation of national security education for higher vocational students

National security education aims to make higher vocational students realize the importance of safeguarding national security by introducing the situation and thoughts of national security to them, so as to consciously pay more attention to national security. However, there are some problems in the education of many higher vocational colleges, such as insufficient content, unitary teaching methods, backward teaching concepts, and unreasonable structure of teachers, leading to the students' insufficient in-depth study of national security knowledge. And most of the current vocational college students are the only child, family care is more, resulting in their lack of a certain sense of social responsibility, so the sense of national security is weak. In this case, many higher vocational students are more passive in learning national security knowledge, and lack initiative and enthusiasm in the learning process. The existence of these problems directly affects the effect of national security education of higher vocational students.

2. The necessity of national security education for higher vocational students

(1) The importance of national security education for vocational college students

First, national security is the foundation of China's stable development. National security is a prerequisite for stability and development of a country, nation and society. At present, China is in a critical period of comprehensively deepening reform. If we want to better meet the requirements of economic development, we must raise our awareness of national security. Therefore, national security education for higher vocational college students can effectively enhance their national security awareness, help to improve the ideological and moral level of students, and promote their healthy growth.

Second, higher vocational colleges are important positions for personnel training in China. Higher vocational colleges shoulder the heavy responsibility of training highly qualified skilled talents. National security education for higher vocational students is conducive to cultivating students' patriotic feelings and sense of social responsibility, and improving their professional and practical ability.

Thirdly, at present, China is in the era of popularization of higher education, and higher vocational education occupies an important position in the whole education system. Strengthening national security education can help students establish correct values and ideology, improve their overall quality and professional level, and also effectively improve the education level and quality of higher vocational colleges in China.

Fourthly, national security education for higher vocational college students is helpful to enhance their awareness of national defense and potential dangers.

(2) The impact on higher vocational students under the general environment

Globalization trend is increasing, China has entered the Internet era, any country in the world has a move will immediately spread in every corner, therefore, in such a world with little privacy of information, as far as the students of higher vocational colleges, as one of the important parts of the Internet users, they accept constantly updated and alternating fresh information every day, They are good at accepting new things, good at communication, it is because of this, they are more easily exposed to a lot of not conducive to their own physical and mental health development of the information content, the information content is slowly destroying the students to maintain the honor and safety of the motherland psychological line of defense, at the same time, it also increases a certain difficulty for higher vocational national

security education. Based on this, vocational college students' national security education must be placed in the first place, actively broaden the path of education, increase the publicity and consolidation of local cultural ideas, really build an invincible network barrier, strictly prevent bad information from taking advantage of.

(3) Practical significance of implementing national security education

The purpose of this study is to find out the practical problems of national security education of higher vocational students at the present stage, clarify the main influencing factors of national security education, improve students' national security awareness, and combine with the specific requirements of national security concept, formulate and propose implementable optimization measures, so as to build a harmonious society and safeguard national security.

3. Based on the optimization strategy of national security education for higher vocational students

(1) Seize the network position and create a positive, healthy and upward network environment

With the rapid development of the Internet, the Internet has become an indispensable part of people's life, especially for vocational college students, who are increasingly dependent on the Internet. Therefore, in order to improve vocational college students' awareness of national security, schools should make full use of the Internet to create a positive, healthy and upward network environment.

First, through the development of the theme activities, let the students establish the right values. Schools should use various ways to publicize and educate students. For example, during the National Security Education Day, some themed activities can be organized to publicize the knowledge of national security. For example, students can be promoted through campus radio stations, publicity Windows, display boards, etc., so that they can actively participate in the day.

Second, educational activities can be carried out through new media platforms such as wechat official account and Weibo. When using new media platforms to carry out educational activities, it is necessary to pay attention to the screening and review of information content, and guide higher vocational students to set up correct values and world outlook. For example, some information related to national security can be released on the wechat public account of the school.

Third, organize students to participate in network security knowledge competition activities. When carrying out the network security knowledge competition, it is possible to interpret the rules of the competition and conduct relevant training for students to carry out this activity, so that students can learn more about network security knowledge and information content in the competition, and improve their national security awareness and level in this way.

Fourthly, strengthen the cultivation and training of teachers' network literacy. As teachers in higher vocational colleges, they should fully realize the influence and importance of network on students in higher vocational colleges, and at the same time, they should master certain knowledge and skills of network, so as to better guide students in higher vocational colleges to form correct values and world views. Therefore, schools should strengthen the cultivation and training of teachers' network literacy, and encourage teachers to participate in this work.

(2) Optimize the way of national security education for students in higher vocational colleges and educate them in an all-round way

First, the curriculum of national security education should be optimized to strengthen teachers. As the teachers of higher vocational colleges, according to the actual situation of the school, combined with the characteristics of higher vocational students, to formulate a reasonable teaching plan, and on this basis to strengthen the construction of teachers. At the same time, the teachers of higher vocational colleges should strengthen the optimization and perfection of the curriculum of national security education according to the new problems and new ideas emerging in the current society. Only in this way can students' ideological and moral quality and legal quality be better improved.

Secondly, we should use a variety of teaching methods. In higher vocational colleges, in order to improve students' level of ideological and political education and national security education, various forms of teaching can be adopted. For example, integrating national security education into military theory courses, taking the curriculum as the carrier, flexibly penetrating into the relevant contents of national security education, and enhancing students' awareness of potential dangers by explaining the overall national security concept, the domestic and foreign security situation and the surrounding security environment in detail. In addition, national security education can also be infiltrated into the process of professional literacy education, and the knowledge, awareness and skills needed to safeguard national security are constantly transmitted to students in a stepped way, so as to enhance students' spirit of responsibility.

Thirdly, national security education should be carried out by relying on campus cultural activities. Campus cultural activities have hidden educational value and function, and is also one of the main content sources of national security education. With the student union, the Communist Youth League and other school student organizations at all levels as the carrier, the national security education into various kinds of colorful campus cultural activities, such as science and technology academic festival, cultural and sports arts festival, theme class meeting, theme youth League day, community activities and other activities, such as the launch of all students theme speech competition, national defense knowledge competition, drama performance, etc. Play movies with national security as the theme, so as to fully mobilize the students' active initiative to participate in various activities in the form of these students' enjoyment, and improve the effectiveness and effectiveness of national security education.

(3) Actively mobilize various forces in national security education and pay attention to development and innovation

Higher vocational colleges should give full play to the role of student cadres' self-management, class and league organization construction, fully mobilize students' subjective initiative in learning, and further enhance students' self-learning and self-education

consciousness, which is more conducive to the in-depth implementation of national security education in the future.

First of all, pay attention to model mining and development. College students are a dynamic group, and they will become an indispensable key force in the construction of socialist country and the promotion of social stability and sustainable development in the future. Therefore, higher vocational colleges should strive to attract and encourage outstanding students to join the Communist Youth League and the student union, so that they can be as familiar with and understand the relevant knowledge of all aspects of national security as possible, and use knowledge to drive practice, so that every student can voluntarily participate in the activities related to national security education. At the same time, constantly enhance the national security consciousness of student cadres, with a wealth of theoretical knowledge to nourish their spiritual core, so that they imperceptibly aggregate to become an example of ordinary students, on campus, within the class to create a harmonious and relaxed learning atmosphere, and then drive more and more students to form the right national security consciousness, construct a positive three-point system.

Secondly, we should constantly strengthen the construction of student league branch, class and student organization. Vocational league organizations and other student organizations play an important role in the construction of campus culture, social practice and voluntary service activities. Therefore, vocational colleges should strengthen their combing and construction from different perspectives such as organizational structure, activity implementation, management methods, so as to give full play to the guiding and leading role of relevant organizations in the student group.

(4) Improve the evaluation, examination and incentive mechanism of national security education for students in higher vocational colleges

Vocational students' national security education needs to be implemented through the construction of a perfect assessment and incentive mechanism. On the one hand, it is necessary to combine the actual situation of national security education to clarify the objectives of the construction of the assessment and incentive mechanism for vocational students' national security education. On the other hand, on this basis, combined with the specific content and requirements of national security education work, constantly optimize and innovate the mechanism. Specifically, in the assessment and evaluation system, we can use the usual homework, final examination, examination and other ways to conduct comprehensive evaluation; In terms of the incentive mechanism, we can use the methods of evaluating the best and awarding honorary titles. For example, students with excellent performance should be awarded the honorary titles of "national security education model" and "role model leader". In addition, teachers should also pay attention to the process of assessment and evaluation of students, so as to fully demonstrate the fairness and justice of education.

Conclusion

To sum up, strengthening national security education is a long-term and arduous project. In order to improve the effect of national security education for higher vocational students, higher vocational colleges must attach importance to stimulating students' learning interest and enthusiasm in the teaching process. Teachers should combine with the actual situation of students to carry out teaching activities. At the same time, in order to better promote the development of national security education, we should also pay attention to the evaluation and incentive mechanism construction strategies, education and teaching means, methods of research, only in this way, in order to cultivate more professional talents in line with national standards and requirements, students can achieve the internalization of national security education in mind, but also in practice. To make due contributions to safeguarding national security.
